

MESSAGE FROM THE PRESIDENT

Dear Members,

It is our pleasure to present the IES Engineering Directory 2023 to you. As we transit out of the pandemic and forge ahead to build a better future for Singapore, this publication will serve as a resource for our members to re-connect and re-establish collaborations with engineers from various disciplines.

In tandem with our sustainability efforts, we have decided to go fully digital with this directory. You will be able to conveniently access it and easily search for information anywhere, anytime. In addition, we are making this e-directory publicly accessible for the first time, so our members can connect to the wider world.

Going digital also dovetails with our IES Green Plan 2030 which is developed to support the Singapore Green Plan 2030, the whole-of-nation movement to advance Singapore's national agenda on sustainable development in the next decade.

Aimed at providing national-level institutional support to the Singapore Green Plan 2030, the IES Green Plan 2030 identifies our attributes and positions IES to strengthen our relevance as the actionable voice of engineers in supporting Singapore for a sustainable future.

Stemming from our values of Inclusivity, Empathy and Stability, the IES Green Plan will act as a blueprint for development of engineering capabilities in emerging areas aligned with our national priorities.

It is a bold, ambitious and unprecedented plan - one that will only accomplish its goals with your support and active participation. We invite you to step forward to join us on this sustainability journey by volunteering your expertise, knowledge and time to the implementation of the plan.

I look forward to working with all of you to harness engineering to shape our future into one that is sustainable, liveable and resilient.

Mr Dalson Chung

President

The Institution of Engineers, Singapore
